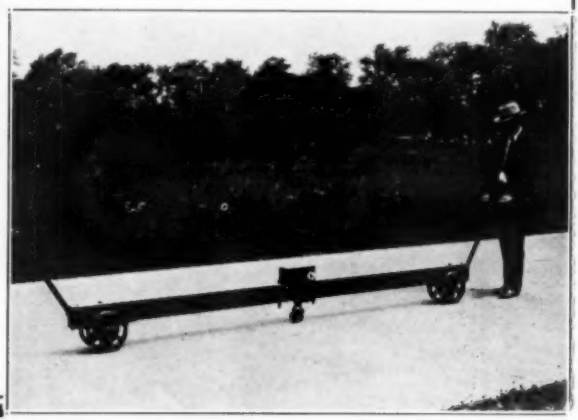
THE "HILL" SURFACER

is the "heavyweight champion" of them all in wiping out the bumps in concrete and bituminous pavements. Weighing 550 pounds, it cleans up twice the usual amount of work at one-half the expense. Its roller-bearing rubber-tired rear wheels make it easy to move. Its special air filter keeps dust from the working parts. Two of its biggest features are the ability to vary the pressure of the cutting head on the pavement (by forward or backward movement of the axle) and the ability to work at various elevations (by means of a vertical adjustment of the axle).



THE "HILL" SURFACE TESTER

is no "lightweight" either! It is a precision instrument built stout and strong, so as to keep its accuracy under the hardest of usage. It is, of course, a much more efficient and accurate instrument than the ordinary straight edge.

For complete details on the "HILL" SURFACER and the "HILL" SURFACE TESTER, write:

Cheap Dirt!!
With the Blaw-Knox (Ateco)
Hydraulic DIRTMOVER

- *Cheap Dirt*—lower and lower cost, per yard are being obtained on many throughout the country by contractors using the Blaw-Knox (Ateco) Hydraulic DIRTMOVER.
- Yardage costs such as $.0495 per cubic yard, and lower, dependent upon length of haul—are a matter of common record. We would like to tell you about contractors who are making real money out of all kinds of dirt moving jobs.
- Ask about the low cost DIRTMOVER—and the Hidden Power BULLDOZER, or the TAMPING ROLLER.

DON'T WAIT
until you get a job!

With bids being opened in every part of the country, it is important that you get complete information on equipment you will need. Find out how you can save money and cut your costs by using the right kind of equipment—do it before you put in your bid, not after you get a job.

If you are going to bid on any bituminous road work, be sure to get full particulars on the Littleford line of equipment—it is designed for construction and maintenance of bituminous roads. It includes Pressure Distributors, Supply Tanks, Tar and Asphalt Kettles, Surface Heaters, and many other outfits essential to efficient work on secondary highways.

Don't wait until you have a job—get your information now. Write for our General Catalog—look through it—pick out the equipment you need—get prices. Then you'll be ready to act quickly!

You can make quick work of dusty roads with the Littleford Pressure Distributor. Made in sizes from 300 to 1500 gallons. Complete information sent on request.

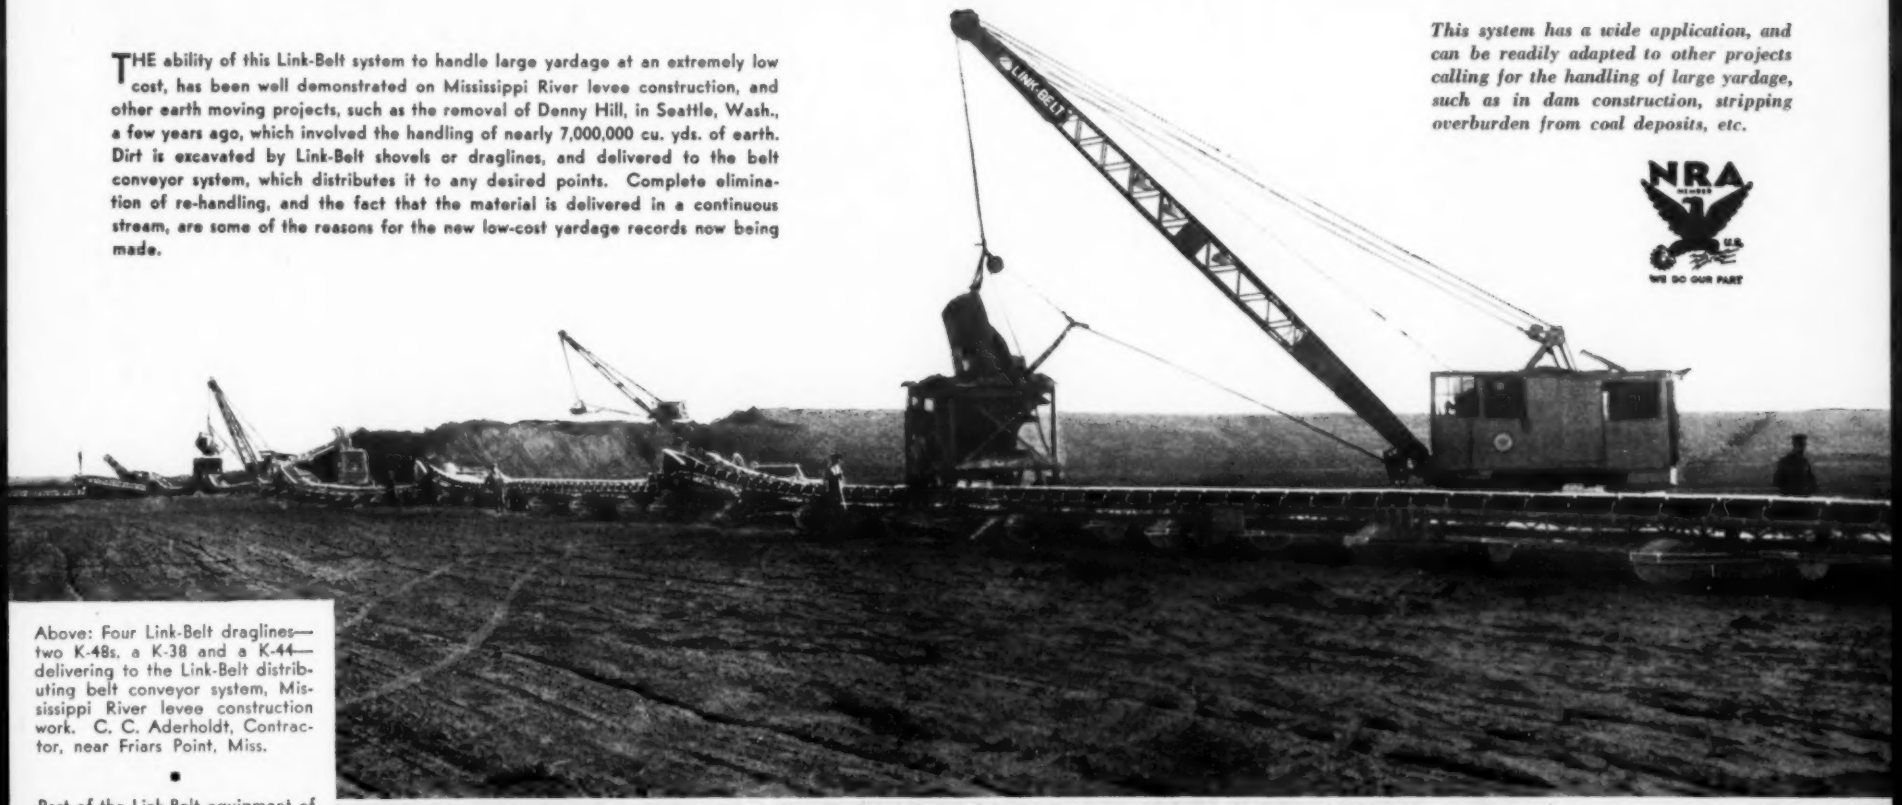
Low-Cost Dirt Moving

with LINK-BELT Conveyors and Excavating Equipment

THE ability of this Link-Belt system to handle large yardage at an extremely low cost, has been well demonstrated on Mississippi River levee construction, and other earth moving projects, such as the removal of Denny Hill, in Seattle, Wash., a few years ago, which involved the handling of nearly 7,000,000 cu. yds. of earth. Dirt is excavated by Link-Belt shovels or draglines, and delivered to the belt conveyor system, which distributes it to any desired points. Complete elimination of re-handling, and the fact that the material is delivered in a continuous stream, are some of the reasons for the new low-cost yardage records now being made.

This system has a wide application, and can be readily adapted to other projects calling for the handling of large yardage, such as in dam construction, stripping overburden from coal deposits, etc.

NRA
WE DO OUR PART



Above: Four Link-Belt draglines—two K-48s, a K-38 and a K-44—delivering to the Link-Belt distributing belt conveyor system, Mississippi River levee construction work. C. C. Aderholdt, Contractor, near Friars Point, Miss.

•

Part of the Link-Belt equipment of H. E. Culbertson Co., of Cleveland, engaged in changing the channel of the Grand River. Dirt from the new channel is thrown up as a dike to provide additional spoil storage space for refuse from Diamond Alkali Company's Plant, Fairport, Ohio.

You can perform your part of the big public works program most efficiently by using . . DU PONT EXPLOSIVES

There is a

VAST ROAD-BUILDING and other construction projects, involving expenditures of hundreds of millions of dollars, are being started by Federal and State Governments.

In undertaking your share of this great construction plan, and also in the completion of other projects that you have under way or in prospect, you want to use the most effective and reliable materials. Unless they are carefully selected and efficiently used, the anticipated results will not be achieved.

Through the 130 years during which the du Pont Company has been manufacturing explosives, it has steadily been improving its products and developing new types for definite purposes. With modern plants situated in strategic areas, ample production is assured. Its nation-wide distribution system ensures promptness in the execution of orders for du Pont explosives.

The extensive variety of explosives available for various uses makes it important to exercise care in their selection. Assurance of obtaining the RIGHT products will be found in restricting selections to du Pont explosives, which have earned world-wide recognition for superiority.

Our explosive engineers are observing and reporting the performances of du Pont explosives on a great many projects throughout the country. These findings are available to all engineers, contractors, and others engaged in the Government's construction program, or in any project in which the uses of explosives are essential.

Inquiries relating to selection and use of explosives should be addressed to any of our Branch Offices, or to

Huntington Joplin New York
Pittsburgh Scranton Seattle

DU PONT
REG. U. S. PAT. OFF.

THOROUGH CUTS

WHEN a cut is to be made through a hill leaving a bank or wall on either side, use Du Pont Quarry Gelatin, Red Cross Extra, Red Cross Blasting Free-Running Powders or R. R. P. The explosive to select depends upon the nature of the rock and the working conditions.

Quarry Gelatin is made especially for wet outside work. Use the higher strengths for hard rock, and the lower ones for soft or easier-breaking rocks.

If the holes are not particularly moist, Red Cross Extra will give good results. For deep holes in fairly dry work, the Free-Running Red Cross Blasting Powders are very economical.

BOULDERS

FOR mudcapping, remove the dynamite from the shell, pack it in a conical heap on the boulder; insert cap and fuse, cover explosive with several inches of thick, heavy mud. Never lay stones on top of mudcap.

For snake-holing, punch hole beneath boulder and in such a location as to ensure charge being placed against boulder. Tamp charge compactly.

Red Cross Extra 20% or 40%, Du Pont Extra D, or Agritol are effective for snake-holing where there is heavy soil under boulders to provide the required resistance.

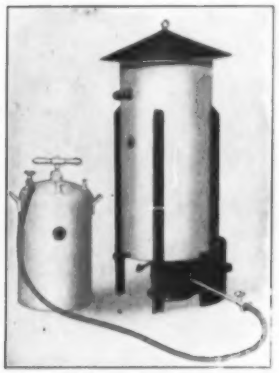
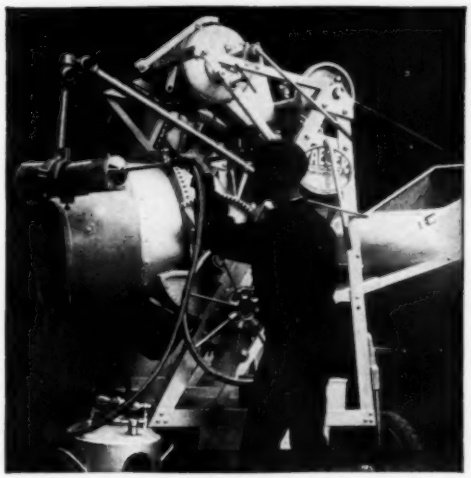
With this
HEATING EQUIPMENT
You can continue Your NRA *Program through the Winter*



The Littleford Jacketed Oil-Burning Water Heater turns out 300 gallons of water per hour at a temperature of 175 degrees Fahrenheit. Let us tell you about it. Write for complete information.

For successful concrete construction, use Littleford Concrete Heaters and Water Heaters to heat aggregate and water. Don't take chances in freezing weather—pour your concrete at correct temperature.

Write for full particulars and prices about Littleford Heating Equipment. Without obligation to you, we will tell you about equipment that will enable you to carry your NRA program right through the winter.



Littleford Concrete Heater Unit attached to a tilting drum mixer. Because of the Littleford Universal Attachment, our Concrete Heater can be attached to either tilting or non-tilting drum mixers. Littleford Heaters do not interfere with charging or discharging. They are made in sizes and styles for mixers of capacities from 3½ to 28 cubic feet.

Statement of the Ownership, Management, Circulation, etc., Required by the Act of Congress of March 3, 1933, of Contractors and Engineers Monthly Published Monthly at New York, N. Y., October 1, 1933.

State of New York, County of New York, ss.:

Before me, a Notary Public, in and for the State and County aforesaid, personally appeared EDGAR J. BUTTENHEIM, who, having been duly sworn according to law, deposes and says that he is the Owner of the Buttenheim-Dix Publishing Corp., Publishers of CONTRACTORS AND ENGINEERS MONTHLY and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management, etc., of the aforesaid publication for the date shown in the above caption, required by the Act of March 3, 1933, embodied in Section 537, Postal Laws and Regulations, printed on the reverse of this form, to wit:

1. That the names and addresses of the publisher, editor, managing editor, and business manager are:
Publisher, BUTTENHEIM-DIX PUBLISHING CORP., 470 4th Ave., N. Y. C.
Editor, THEODORE R. KENDALL
Managing Editor, NONE
Business Manager, THEODORE R. KENDALL

2. That the owner is: (If owned by a corporation its name and address must be stated and also immediately thereunder the names and addresses of stockholders owning or holding one per cent or more of total amount of stock. If not owned by a corporation, the names and addresses of the individual owners must be given. If owned by a firm, company or other unincorporated concern, its name and address, as well as those of each individual member, must be given.)
BUTTENHEIM-DIX PUBLISHING CORP., 470 4th Ave., N. Y. C.
Stockholders: EDGAR J. BUTTENHEIM, 470 4th Ave., N. Y. C., J. T. DIX, Chicago, Ill., GEORGE S. CONOVER, Cleveland, O., Roy Press, 63 Beekman St., N. Y. C.; HAROLD S. BUTTENHEIM, THEODORE R. KENDALL, HERBERT K. SAXE, MYRON MACLEOD, 470 4th Ave., N. Y. C.

3. That the known bondholders, mortgagees and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages or other securities are: (If there are none, so state.) None.

4. That the two paragraphs next above, giving the names of the owners, stockholders, and security holders, if any, contain not only the list of stockholders and security holders as they appear upon the books of the company but also, in cases where the stockholder or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name of the person or corporation for whom such trustee is acting, is given; also that the said two paragraphs contain statements embracing affiant's full knowledge and belief as to the circumstances and conditions under which stockholders and security holders who do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona fide owner; and this affiant has no reason to believe that any other person, association, or corporation has any interest direct or indirect in the said stock, bonds, or other securities than as so stated by him.
